About This Game

Way to Go! is a game with simple rules and surprisingly tricky puzzles.

The Temple of Peace is in disarray: somebody has stolen the gems from the tree that bears jewels for all the peoples of the world. Help your three little heroes Rob, Egg and Liz to find the gems again!

Just use the mouse to drag commands onto the tiles and guide your heroes to the exit. You can rewind at any time to correct mistakes.

Way to Go! has over 400 levels, guaranteeing hours of fun.

A heart-warming story told in over 20 cutscenes

406 levels

Lovingly-crafted graphics

Cute characters

Four game modes

Intuitive controls

Rewind function

Trophies for completed levels

Low hardware requirements

Title: Way to Go!

This is a robo-style puzzlegame. This means that you have a limited amount of commands available with which to guide your protagonist to the goal. If you have ever played boardgames like Robo Turtles or Robo Rally the game mechanics should be familiar to you. Don't let yourself be fooled by the fun and cartoonish artwork or even the easy first levels. This game gets harder as it progresses.

I'm one of those gamers who likes to buy his game on the cheap. Yet this is one of the few games I bought the day it was launched here on steam. It's on sale now, but really you should buy this game even at full price..

One of the best puzzle games you could find.

The concept is to guide your character(s) to the end of the level, using a limited number of actions to program their movements.

- + There are quite a number of different mechanisms, from one character to the other (one will be able to activate switches, other will be able to burn boxes ...)

- + The adventure is rich, with more than 200 levels, with various difficulties (going from the tutorial to the brain scatcher).

- + Furthermore, there are also "bonus" content that you unlock during the adventure, with some other extra levels, and some other modes with slightly different gameplay.

- + The music is calm and soothing

- + There is a scenario (well, not the most exciting, though)

- + A way to make actions go step by step, and undo/forward as much as you want (or restart the level if you prefer)

- + 3 "Skip level" (compasses) if you're stuck so you can continue (don't abuse of them, you've got only 3, though)

- Characters and other sprites don't blend very well with the rest of the graphics, but well, that's absolutely not a problem !

Overall, one of the best puzzle games I have in my library, and glad to have it !. I've left my original (and positive) review below, but I'm now changing it to negative because first it stopped displaying correctly (Mint 17.2) and now doesn't launch at all (Mint 17.3) and the developers haven't been in the forums in forever, so I can't get any support.

An excellent and quirky pathfinding puzzler. Bright, challenging, and non-linear. Only flaw is that it has no achievements.. It's basically a block-pushing game without having any control on the characters auto-movements. Your job is to lead the heroes to the goal by placing "commands" on the floor. They will push blocks, avoid traps, and use their abilities and even team up every now and then.

This game reminds me of RUSH, also in Steam, which has the exact same premise only it is in full 3D, where you lead blocks to certain goals by placing commands on the floor. It also reminds me of Parcel and other Sokoban-type games alike, due to the nature of pushing blocks out of the way and using their special abilities to reach the goal.

With that said, I would rather play RUSH because it is the superior game, in my opinion. Also, I would rather play other Sokoban games for the block-pushing mechanics, such as Parcel and the like.. Highly fun and enjoyable game, a must get for those that like solving puzzles. There's a few game rules and mechanics that you need to experiment and learn for yourself as not everything is included in the game's guide. Some stages have the perfect solution involved less number of steps than the displayed number, perhaps not a mistake but rather a three star minimum benchmark. Overall a great game that requires some cleverness and approximately 50-100 hours to fully conquer (3 star every stage).. If you like puzzle games, then this one is a must have.

Some puzzle games can be hard because the levels are long or convoluted - not this one, the levels at first seem small, but they are *extremely clever and can be tricky in all the right ways*.

It is also fun to watch, as there are different characters who do different things in cute ways (it still makes me chuckle every time

Egg eats a mushroom). I am going to leave it to you to discover all the different game elements, as that is half the fun.

10 outa' 10 - for sure!
